2 Acutrack, Inc., and alleges as follows:

3 THE PARTIES

4 1. Plaintiff Innovative Automation LLC ("Plaintiff" or "Innovative Automation")
5 is a limited liability company organized and existing under the laws of the State of
6 California, with its principal place of business at 606 North First Street, San Jose, California
7 95112.

8 2. On information and belief, Defendant Acutrack, Inc. ("Acutrack") is a

14 4. This action is for patent infringement pursuant to the patent laws of the United
15 States, 35 U.S.C. §§ 1 *et seq.* This Court has subject matter jurisdiction over the action

CLAIM FOR RELIEF

(Infringement of United States Patent No. 7,174,362)

7. Plaintiff realleges and incorporates by reference paragraphs the above paragraphs of this Complaint, inclusive, as though fully set forth herein.

8. Plaintiff is the owner of all right, title, and interest in United States Patent No. 7,174,362, entitled "Method and System for Supplying Products from Pre-Stored Digital Data in Response to Demands Transmitted via Computer Network," duly and legally issued by the United States Patent and Trademark Office on February 6, 2007 (the "'362 patent"). A true and correct copy of the '362 patent is attached hereto as Exhibit A.

9. The '362 patent generally describes and claims a computer-implemented method of digital data duplication. In the method of claim 1 of the '362 patent, a request is taken at one or more user interfaces and is transmitted through a network to a computer. The computer contains a module to create a task log based on incoming requests; a module for storing the necessary data; and a module to create a subset of the data, download that subset to an output device, and command the device to transfer the subset onto blank media. The request is assigned to an output device, and the duplication process is executed. Claims 2-8 of the '362 patent describe various other methods and a system of digital data duplication.

10. Defendant has infringed, and continues to infringe, literally and/or under the doctrine of equivalents, one or more claims of the '362 patent under 35 U.S.C. § 271 by using the claimed method(s) of duplicating digital data while performing Defendant's digital media duplication services such as its optical media duplication services.

11. As a result of Defendant's infringing activities, Plaintiff has suffered damages in an amount not yet ascertained. Plaintiff is entitled to recover damages adequate to compensate it for the Defendant's infringing activities in an amount to be determined at trial, but in no event less than reasonable royalties, together with interest and costs.

12. Plaintiff reserves the right to allege, after discovery, that Defendant's infringement is willful and deliberate, entitling it to increased damages under 35 U.S.C. § 284, and to attorneys' fees incurred in prosecuting this action under 35 U.S.C. § 285.

PRAYER FOR RELIEF

WHEREFORE, Plaintiff requests entry of judgment in its favor against Defendant as follows:

a) For a declaration that Defendant has infringed, directly and/or indirectly, the '362 patent;

b) For an award of damages adequate to compensate Plaintiff for Defendant's infringement of the '362 patent, but in no event less than a reasonable royalty, together with prejudgment and post-judgment interest and costs, in an amount according to proof;

c) For an entry of a permanent injunction enjoining Defendant, and its respective officers, agents, employees, and those acting in privity, from further infringement, including contributory infringement and/or inducing infringement, of the '362 patent, or in the alternative, awarding a royalty for post-judgment infringement;

d) For an award of attorneys' fees pursuant to 35 U.S.C. § 285 or as otherwise permitted by law; and

e) For an award to Plaintiff of such other costs and further relief as the Court may deem just and proper.
